    1. The LERF groundwater permit conditions are being worked by Ecology. Linda Petersen (FH) reported that the proposed delisting modifications and changes to the RCRA permit class 1 modifications for LERF/ETF were submitted to Kathy Conaway (Ecology) for review. There was some discussion regarding the Solid Treatment Unit (STU), which is scheduled as a 2010 line item. It was agreed that the STU discussion will be closed until a later date.

- B. 310/340 Status
  - 1. Ms. Petersen reported that in an effort to provide a solution for the modutank sediment issue (see Purgewater PMMs), a decision has been made to bring two drums of non-listed waste from well development to 310 TEDF. The waste will be run through a mini-filter press to see if it cakes properly. The drums will be brought to 310 TEDF in the August/September 2007 time frame. Groundwater is also considering other options to resolve the sediment issue.
